

Summer Internship: Integration with chatt

XMReality AB develops and sells solutions that revolutionizes knowledge sharing through augmented reality (AR). The company is a market leader in remote guidance, which uses AR to guide onsite staff and enable them to resolve or prevent problems.

XMReality's customers are mainly global industrial companies, including Bosch Rexroth, ABB, Siemens Industrial Turbomachinery, Electrolux and Bombardier. XMReality is headquartered in Linköping, Sweden, and is listed on Nasdaq First North (ticker: XMR). www.xmreality.com

About XMReality Remote Guidance

XMReality Remote Guidance is an AR-enabled knowledge sharing tool that lets you communicate with gestures, speech, chat and pointers with someone at a completely different place. It includes:

A unique hands-overlay technology that lets you guide someone else's hands—as if you were there.

A web portal to manage teams and users, and to measure usage

Easy access to the solution using apps and web-clients

Background

Many of our customers rely heavily on various chatt tools (WhatsApp, Microsoft Teams, Slack, ...) to coordinate work in their service teams. As this is sometimes their main communication tool it would be interesting to be able to start a remote guidance session from the chatt tool.

Internship proposal

Investigate integration possibilities with common chatt solutions. Develop prototype integrations with at least one such chatt solution.

Application

Are you ready to take on the challenge? Apply now and no later than March 1st by sending a personal letter and your CV to hr@xmreality.se. Questions? Contact Per Unell, CTO, at per.unell@xmreality.se or 072-156 10 04
